2ND PALANTIR PROJECT PILOT

6 July 2023 10:00 AM CET

The 2nd Pilot on PALANTIR cybersecurity solutions for small SMEs and micro-enterprises targets specifically the environment of the Medical Professional. The pilot will demonstrate how an attacker may exploit limited or no security protection usually available in MD

practitioner offices in order to execute a series of attacks that may potentially prevent the practitioner from efficiently working, loss of data, access to private medical information, patient data being held for ransomware etc.

The Pilot will demonstrate the capability of PALANTIR platform in preventing and mitigating these types of attacks protecting the medical practitioner business and private data.
