# PALANTIR

Scope and Motivation

The industry gap

Cyber-attacks are being deployed with increasing frequency and impact. SMEs and MEs have limited access to novel cyber defence measures becoming attractive victims to cybercriminals.

The PALANTIR approach

We focus on improving novel technologies to make them affordable and sustainable. Addressing gaps for better performance and cost cuts for all relevant stakeholders.

Our Goal

PALANTIR envisions a value chain among its stakeholders.

Service developers monetise their products through the Service Catalogue

Telcos, ISPs, Cloud Providers, Cybersecurity companies, etc. deploy the PALANTIR platform in their infrastructure

SecaaS clients SMEs/MEs purchase services from the PALANTIR providers.
